

## Women's Health

North Shore-LIJ Women's Health is widely recognized for providing outstanding healthcare for women over the entire range of primary, specialty and subspecialty areas. Prevention and early detection are our goals. We emphasize the importance of regular physical exams, follow-up exams and patient education about treatment plans.

Services are provided in a collaborative manner by board certified subspecialty-trained physicians which include obstetricians, maternal-fetal medicine specialists, infertility specialists, gynecologists, urogynecologists, pelvic reconstructive surgeons, gynecologic oncologists, perinatologists, reproductive endocrinologists, pediatric and adolescent gynecologists, and other subspecialty physicians, along with our outstanding team of nursing and health professionals.

## The Precedent for Excellence in Women's Healthcare Has Been Set

Katz Women's Hospitals offer a broad range of obstetric and gynecological services that empower and care for women as they transition through life. Our comprehensive list of specialized woman's services includes:

- **Maternal-fetal medicine (high risk obstetrics)**  
State-of-the-art services, testing and treatments for women with high risk pregnancies. Genetic counseling, first trimester screening for chromosomal abnormalities, Chorionic Villus Sampling and amniocentesis and 3D-4D ultrasounds are among the services offered.
- **Gynecologic oncology (cancer)**  
Comprehensive, cutting edge, coordinated care for all gynecological cancers leveraging the latest technology in minimally invasive, laparoscopic and robotic techniques.
- **Urogynecology**  
The first Urogynecology program on Long Island, we provide progressive care for women with pelvic floor dysfunction including urinary incontinence, urogenital prolapse, pelvic or bladder pain, overactive bladder and sexual dysfunction.
- **Minimally invasive and robotic surgery**  
Revolutionary techniques practiced by world renowned surgeons that result in shortened hospital stays, decreased postoperative pain, improved cosmetic results and a rapid return to normal activities.

- **Infertility reproductive services**  
Advanced reproductive therapies that result in among the highest success rates in the nation, including In Vitro Fertilization, Preimplantation Genetic Diagnosis, intrauterine inseminations, donor egg/sperm programs and reproductive surgeries, to name a few.
- **Perinatal and obstetrics programs**  
Providing the highest level of care in the region, our specially trained staff emphasizes patient education for pregnancy, delivery, breastfeeding and newborn services while delivering first rate care.
- **Pediatric and adolescent gynecology**  
Protecting the future reproductive functioning of young patients, we provide minimally invasive diagnostic and surgical approaches for common concerns and rare disorders. Your child's welfare is our priority.
- **Diabetes in pregnancy**  
Individualized care and education for women with pre-existing and gestational diabetes, providing support before conception and after delivery. Program recognized by the American Diabetes Association.

Through our two facilities – **Katz Women's Hospital at North Shore** and **Katz Women's Hospital at LIJ** – women now have seamless access to the world class subspecialty services of the entire North Shore-LIJ Health system.

*Caring for women at all stages of their lives with advanced technology, cutting edge treatments and compassionate care.*
