Brain aneurysm survivors and their families, along with staff from the Cushing Neuroscience Institute's Brain Aneurysm Center.

The Brain Aneurysm Center of the North Shore-LIJ Health System's Cushing Neuroscience Institute, along with the Brain Aneurysm Foundation, recently hosted Long Island's fourth annual Brain Aneurysm Awareness Walk. Held at Jones Beach, this year's walk raised approximately \$60,000, which will benefit both organizations.

"One of the goals of this event is to increase awareness about the warning signs of a brain aneurysm," said David Chalif, MD, co-director of the Brain Aneurysm Center.

The Brain Aneurysm Foundation is a nonprofit organization whose mission is to provide critical awareness, education, support and research funding to reduce brain aneurysms.
